

The SignalForce® LE-800 Series are proven, high performance shakers, employing a double ended field structure to provide maximum flux density in the central gap for higher efficiency, higher force to current ratio and lower stray magnetic field above the armature surface. The armatures are rugged magnesium castings, which are centered and guided by the high performance flexures and a very stiff bearing. Air-cooling is via remote blower, minimizing noise and heat in and around the shaker test area.

### Standard Features

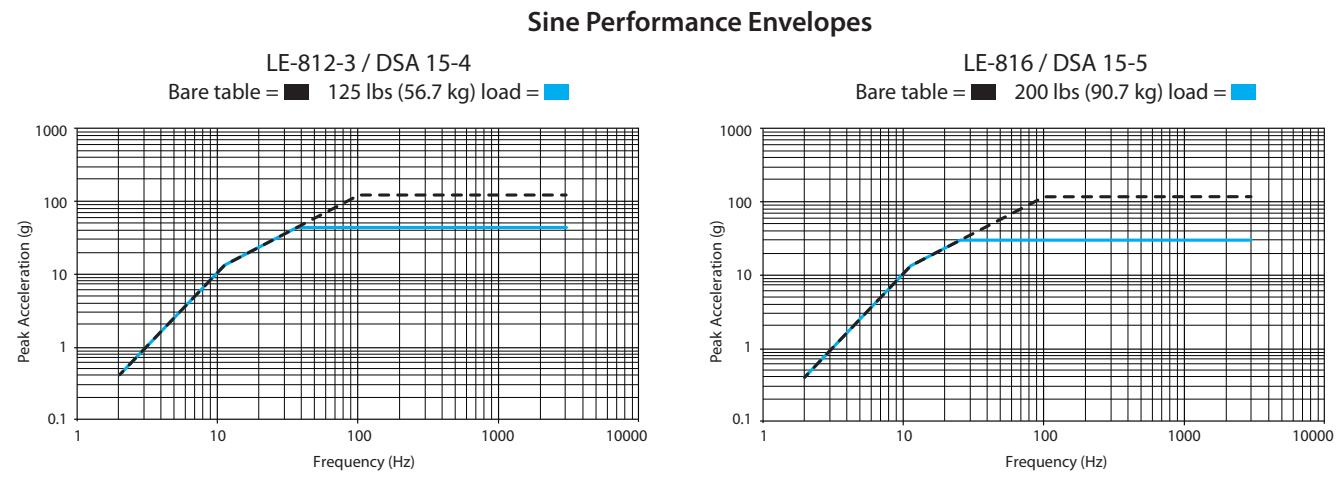

- Peak Sine Force: 8000 lbf (35.6 kN)
- Random Force rms: 8000 lbf (35.6 kN)
- Velocity Peak: 71 in/sec. (1.8 m/sec)
- Armature diameters: 13.25 inch (337 mm) and 17.25 inch (440 mm)
- Automatic armature centering

### Options

- Economy field supply
- Vertical isolation mounts (VI)
- Air isolated trunnions with Lin-E-Air low frequency isolation (VH)
- Air glides
- Guidance systems
- Chamber interfaces
- Monobase systems for sequential three axis testing
- Slip tables

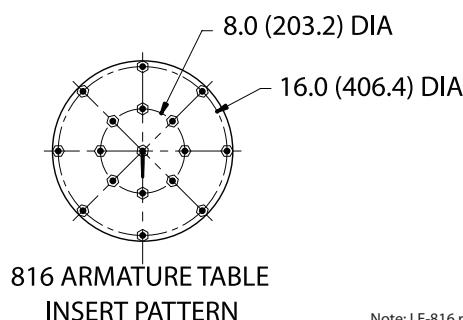

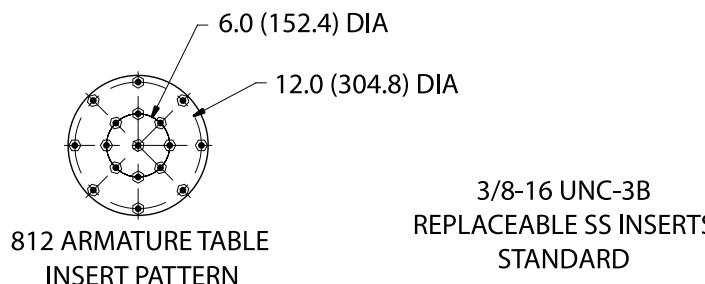

### Typical Applications

- Electronic components
- Aerospace
- Automotive

\* kVA based on power draw to run full capacity of shaker – not amplifier capacity.

Note: LE-816 recommended for use in VI configuration.

## Environmental Characteristics

### Ambient Working Temperature Range

|           |                             |
|-----------|-----------------------------|
| Shaker    | +40F to +100F (+4C to +38C) |
| Amplifier | +32F to +104F (+0C to +40C) |

### Heat Dissipation

|            |  |
|------------|--|
| Shaker     | 13.5 kW                                |
| Amplifier* | 5.3 kW (4 Module)<br>6.6 kW (5 Module) |
| Blower     | 1.35 kW                                |

### Acoustic Noise @ 1m

|           |                      |
|-----------|----------------------|
| Shaker    | 108 dBA              |
| Amplifier | 75 dBA               |
| Blower    | 75 dBA with silencer |

### Humidity

|           |                     |
|-----------|---------------------|
| Shaker    | <95% non-condensing |
| Amplifier | <95% non-condensing |

### Facility Requirements

|                               |   |
|-------------------------------|---|
| Blower cooling air flow       | 1700 CFM (48.14 m <sup>3</sup> /min)  |
| Amplifier cooling air flow*   | 920 CFM (26.1 m <sup>3</sup> /min)<br>(4 Module)<br>1150 CFM (32.6 m <sup>3</sup> /min)<br>(5 Module) |
| Compressed air supply         | 1 CFM at 90 psi<br>(0.03 m <sup>3</sup> /min at 6.2 Bar)  |
| Power supply range            | 208 – 480 VAC, (3) phase  |
| Total electrical requirements | See table   |

## Amplifier Characteristics

### Rated Power\*

60 kVA (4 Module)  
75 kVA (5 Module)

### Efficiency

95%

### Switching Frequency

50 kHz

### Input Impedance

1.5 V rms for full output  
(10 K ohm input impedance)

### Voltage Output

200 V rms

### Current Output\*

332 A rms (4 Module)  
415 A rms (5 Module)

### Distortion

(at rated output) THD  
< 0.5% from DC to 1500 Hz  
0.75% from 1500 to 2000 Hz  
1.0% from 2000 to 3000 Hz

### Noise & Hum

> 70 dB below full output,  
with shorted input

### Weight\*

820 lbs (373 kg) (4 Module)  
855 lbs (389 kg) (5 Module)

### Performance Notes

- Random force rating based on flat spectrum from 20–2000 Hz, with 100 lbs (45.4 kg) non-resonant load. Ratings comply or exceed ISO 5344. For the LE-816 the random rating is based on a 140 lbs (63.5 kg) non-resonant load.
  - Shock pulses will yield different performance characteristics based on duration of the pulse. Consult application specialist to evaluate specific shock pulses.
  - Heavy payloads may reduce available pk-pk displacement.
  - Stray magnetic field measured at full field 6 inches (152.4 mm) above armature table.
  - Shaker weight is variable based on mounting configuration.
  - At maximum force bare table. Acoustic noise from a test will depend on test load and profiles run.
  - Wet bulb temp not to exceed 80° F (27° C).
- Specifications are subject to change without notice.

## Amplifier Dimensions

**Height** 68.5 in (1740 mm)

**Width** 22 in (559 mm)

**Depth** 50.5 in (1283 mm)

## Blower Dimensions

**Height** 41.5 in (1054 mm)

**Width** 22.1 in (561 mm)

**Depth** 50.5 in (1283 mm)

EMI shielded console, air cooled screens,  
and 3-phase line filtering standard.
